

# US Forest Service Aviation TRAINING BULLETIN

**No. FS-TNG 2022-03 (A314)**

**February 1, 2022**

**Page 1 of 1**

**Subject:** A314 Aviation Program Overview for Line Officers and Supervisors

**Distribution:** A314 Instructors

**Discussion:** This course provides a synopsis of US Forest Service aviation program management and overview, as it relates to Line Officers and Supervisors responsibilities. The course units are broken up into the 4 components (pillars) of Aviation Safety Management Systems (SMS) to provide the framework for the course content. The course length is targeted for 3 hours. Instructors are ask to use discretion to buffer time to account for setup, closeout, any additional IT challenges.

**Recommendation:** A revised A314 Aviation Program Overview for Line Officers and Supervisors is now available on the Interagency Aviation Training (IAT) website <https://www.iat.gov/> for use. Currently there isn't an instructor guide available for this course. Instructors are encouraged to use the "Notes" section of the Microsoft Powerpoint as an instructor guide. To view them, click on the "View" tab in Microsoft Powerpoint, and click on the "Notes" button in the toolbar. You will see any available notes at the bottom of the slide.

There will also be additional documents made available in the "course material" tab in IAT, which will help you facilitate the course. As a note this course can be taught in a classroom setting or virtually instructor led.
