PART 1

EDUCATION, QUALIFICATION, AND CURRENCY SYSTEM

A. INTRODUCTION

Most agencies utilize aircraft in the support or accomplishment of many of their programs and projects. These aircraft users are as many and varied as the types of aircraft used. An interagency-wide goal is to accomplish safe, efficient, and effective utilization of aviation resources. Increasing employee awareness of agency policy, procedures, and safe practices must receive high priority. Aviation training, whether basic safety, specialized, or management, is a method to increase this awareness and a key to meeting this goal.

The Aviation Training 2000 Education, Qualification, and Currency System was developed under the direction of the Aviation Management Council for the establishment of aviation training standards for Natural Resource Agency personnel. Personnel meeting these standards are qualified to perform a variety of aviation related tasks.

This system is designed to:

1) Establish minimum training, skills, knowledge, and currency requirements for agency personnel who work with aircraft or have aviation duties in order to accomplish resource (non-fire) missions.

2) Provide a forum for interagency coordination in the development and implementation of aviation education, training, and qualification standards.

3) Maintain a high level of currency in education and training methods and techniques, as well as audio-visual technology, within the budgetary constraints of each individual bureau/agency.

4) Establish an interagency aviation qualification, certification, and documentation system.

5) Establish qualifications and currency standards for interagency aviation trainers (IATs).

6) Utilize a systematic process to assure application of state-of-the-art instructional technology to course planning and development.

B. DESCRIPTION OF THE SYSTEM

The Aviation Training 2000 System is a "training based" system. In this system, the primary criterion for qualification is an individual's ability to complete the training modules with a passing score on an examination.
This system is not designed to supplement or take the place of the National Wildland Coordinating Group's "Wildland Fire Qualification System" (310-1). All Wildland Fire positions should remain under the 310-1 system. However, some 310-1 training courses will supplement or serve as creditable substitutes for training required under the Aviation Training 2000 System.

This system is not designed to supplement or take the place of requirements for agencies that follow the *Interagency Helicopter Operations Guide's* Position Training Qualifications (Chapter 2).

Training requirements include completion of all required training modules prior to functioning in a specific aviation-related position. The aviation training subject matter is designed to be progressive and build upon past training. In some instances, lower level modules will be required before students progress to higher level modules in the same subject matter area (i.e., an air crewmember may need Aviation Policy & Regulations I, while a unit aviation manager may need Aviation Policy & Regulations I, II, and III.)

**Training Modules**

This system is made up of 36 modules of specific aviation-related subject matter. Each subject module is designed to stand alone or can be combined with other modules to create a course-like approach. Any module may be presented in an instructor-led classroom setting regardless of format. This allows agency employees to take only those subjects necessary to do their job. Some modules are very basic, such as “Aviation Mishap Reporting,” which demonstrates how to fill out and submit a SAFECOM and can be completed through computer-based training (CBT) or one-on-one in just a few minutes. Other modules such as "Human Factors in Aviation" are more complex and may require a classroom, instructor-led training session.

Also included in this system are 10 currency modules, which may be CBT or presented in a workshop setting. These modules are designed for specific job functions and include multiple subjects/topics. They will be updated on a periodic basis to facilitate employees' currency in aviation training and issues. The refresher modules are designed to maintain currency while having the least impact on agency budget and employee time.

**Agency Certification**

The education and training of personnel at all organizational levels is the responsibility of management. Aviation users, supervisors, and managers must be knowledgeable of the inherent hazards of aviation operations. Training is essential for employees whose operations are performed in the high-risk environments typically encountered in agency programs and projects.

Two levels of training have been identified. The first level, Required Training, is mandatory as specified for each aviation position. Modules in the second level, Additional Requirements, will be specified by individual DOI bureau/Forest Service policy.
Forest Service and DOI bureau aviation managers are authorized to initially certify Aviation Training 2000 qualifications of existing employees who meet the current certification standards for aviation positions within their organizations (grandfathering). The three-year currency cycle for employee refresher training is not affected by this grandfathering certification.

Agencies will be responsible for certification of personnel based upon the requirements of this guide. This responsibility includes evaluation of personnel for recertification in cases where position qualifications have been lost as a result of a lack of currency. As an option, to facilitate an individual's training documentation, agencies may use the Aviation Training 2000 Individual Training Record and the Aviation Training 2000 Currency Training Record forms (see Appendix).

**Currency Requirements**

Unless otherwise noted, the maximum time allowed for maintaining currency is three (3) years. Currency will be maintained by either completing a CBT refresher module that covers specific positions or, in the case of advanced technical positions, attending a position-specific refresher workshop.

**Aviation Positions**

These positions require a level of specific skills and knowledge to perform aviation duties and ensure safety. Personnel should be assigned only to positions in which they have been successfully trained. It is up to the Forest Service and each DOI bureau to determine positions based on organizational needs and mission objectives.

1. Administrative Staff
2. Agency Administrator
3. Air Crewmember
4. Aviation Dispatcher
5. Aviation Management/Technical Specialist
6. Contracting Officer's Representative (COR)/Project Inspector (PI)
7. Fixed-Wing Manager
8. Fixed-Wing Manager (Special Use)
9. Flight Crewmember
10. Helicopter Manager
11. Mission Specialist
12. Passenger
13. Project Aviation Manager
14. Regional/State/National Aviation Manager
15. Supervisor
16. Unit Aviation Manager
Modules (Subject Matter)

Basic Aviation Skills Training
A-101  Aviation Safety
A-102  Fixed-Wing Safety
A-103  Helicopter Safety
A-104  Overview of Aircraft Capabilities & Limitations
A-105  Aviation Life Support Equipment
A-106  Aviation Mishap Reporting
A-107  Aviation Policy and Regulations I
A-108  Preflight Checklist & Briefing Debriefing
A-109  Aviation Radio Use
A-110  Aviation Transportation of Hazardous Materials
A-111  Flight Payment Document
A-112  Mission Planning & Flight Request Process
A-113  Crash Survival

Intermediate Aviation Skills Training
A-201  Overview of Safety & Accident Prevention Programs
A-202  Interagency Aviation Organizations
A-203  Airspace Management & Coordination
A-204  Aircraft Capabilities & Limitations
A-205  Risk Awareness
A-206  Aviation Acquisition/Procurement I
A-207  Aviation Dispatching
A-208  Aircraft Pre-Use Inspection
A-209  Helicopter Operations
A-210  Helicopter Field Exercise
A-211  Aviation Planning

Advanced Aviation Skills Training
A-301  Implementing Aviation Safety & Accident Prevention
A-302  Personal Responsibility & Liability
A-303  Human Factors in Aviation
A-304  Aircraft Maintenance
A-305  Risk Management
A-306  Aviation Acquisition/Procurement II
A-307  Aviation Policy & Regulations II
A-308  Aviation Policy & Regulations III
A-309  Helicopter Flight Manuals
A-310  Crew Resource Management
A-311  Aviation Program Overview for Agency Administrators
A-312  Water Ditching and Survival

Refresher Training Modules and Workshops
A-401  Aviation Dispatcher Refresher Training (CBT)
A-402  Air Crewmember Refresher Training (CBT)
A-403  Fixed-Wing Manager Refresher Training (CBT)
A-404  Fixed-Wing Manager (Special-Use) Refresher Training (CBT)
A-405  Aviation Transportation of Hazardous Materials (CBT)
A-406  Helicopter Manager Refresher Workshop
A-407  Project Aviation Manager Refresher Workshop
A-408  Supervisor Refresher Training (Agency Specific)
A-409  Unit Aviation Manager Refresher Workshop
A-410  Aviation Management/Tech Specialist Refresher
PART 2
POSITION DESCRIPTIONS AND REQUIRED MODULES

1. ADMINISTRATIVE STAFF

An individual at the unit level responsible for processing Aircraft Use Reports.

   Required Training: Flight Payment Document
   Currency: Per Agency Policy

2. AGENCY ADMINISTRATOR

Line officers who are responsible and accountable for using aviation resources to accomplish agency programs, i.e., park superintendent, agency superintendent, regional director, state director, area director, district manager, refuge manager, forest supervisor, chief scientist.

   Required Training: Aviation Program Overview for Agency Administrators
   Currency: 3 years

3. AIR CREWMEMBER

A person required to work in or around aircraft to ensure the successful outcome of the mission, i.e., resource specialist on aerial reconnaissance mission. This person may function under the direction of the fixed-wing manager or helicopter manager.

   Required Training
   - Aircraft Capabilities & Limitations
   - Aviation Life Support Equipment
   - Aviation Mishap Reporting
   - Aviation Safety
   - Aviation Transportation of Hazardous Materials (if involved in the transport of hazardous materials)
   - Crash Survival
   - Fixed-Wing Safety
   - Helicopter Safety
   - Preflight Checklist & Briefing/Debriefing

   Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy
   - Aviation Policy and Regulations I
   - Mission Specific Training (as required by agency)
   - Aviation Radio Use
   - Personal Responsibility & Liability
   - Crew Resource Management
   - Risk Awareness
   - Helicopter Field Exercises*
   - Water Ditching and Survival
   - Helicopter Operations*
   - Human Factors in Aviation
   - *Required for helicopter air crewmembers only.

   Currency: Air Crewmember Refresher Training (CBT) (3 years)
4. AVIATION DISPATCHER

A dispatcher who may receive, process, and place orders for aircraft, provide flight following and other aviation support services.

Required Training

- Aircraft Capabilities & Limitations
- Airspace Management & Coordination
- Aviation Acquisition/Procurement I
- Aviation Dispatching
- Aviation Mishap Reporting
- Aviation Policy & Regulations I
- Aviation Policy & Regulations II
- Aviation Radio Use
- Aviation Mishap Reporting
- Human Factors in Aviation
- Interagency Aviation Organizations
- Mission Planning and Flight Request Process
- Personal Responsibility & Liability
- Risk Management

Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy

- Crew Resource Management

Currency

- Aviation Dispatcher Refresher Training (3 years)

5. AVIATION MANAGEMENT/TECHNICAL SPECIALIST

Supports the aviation management and safety programs of their respective agencies/units/areas, i.e., technical inspector, aviation safety officer, helicopter operations specialist, and aviation management program specialist.

Required Training

- Aircraft Capabilities & Limitations
- Airspace Management & Coordination
- Aviation Acquisition/Procurement I
- Aviation Dispatching
- Aviation Life Support Equipment
- Aviation Mishap Reporting
- Aviation Planning
- Aviation Policy & Regulations I
- Aviation Policy & Regulations II
- Aviation Policy & Regulations III
- Aviation Radio Use
- Aviation Safety
- Aviation Mishap Reporting
- Crash Survival
- Crew Resource Management
- Flight Payment Document
- Human Factors in Aviation
- Implementing Aviation Safety & Accident Prevention
- Interagency Aviation Organizations
- Mission Planning & Flight Request Process
- Personal Responsibility & Liability
- Preflight Checklist & Briefing/Debriefing
- Risk Management

Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy

- Mission Specific Training (as required by agency)

Currency

- Aviation Management/Technical Specialist Refresher Workshop (3 years)
6. CONTRACTING OFFICER'S REPRESENTATIVE/PROJECT INSPECTOR

An employee who is responsible for compliance with all aircraft contract provisions and specifications; issues work orders/notices of noncompliance as needed; and has the authority to initiate and sign correspondence and other contract administration documents as delegated by an aircraft contracting officer.

Required Training

- Aircraft Maintenance
- Aircraft Pre-Use Inspection
- Aviation Acquisition/Procurement I
- Aviation Acquisition/Procurement II
- Aviation Mishap Reporting
- Flight Payment Document
- Personal Responsibility and Liability
- Agency-Specific Currency Workshop/Conference

7. FIXED-WING MANAGER

Government representative who works jointly with the pilot-in-command and aircrew members to ensure safe, efficient flight management. Some agencies refer to this position as "chief of party." This position does not include special-use operations.

Required Training

- Aviation Life Support Equipment
- Aviation Mishap Reporting
- Aviation Safety
- Aviation Transportation of Hazardous Materials (if involved in the transport of hazardous materials)
- Flight Payment Document
- Mission Planning & Flight Request Process
- Preflight Checklist & Briefing/Debriefing

Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy

- Aircraft Capabilities and Limitations
- Aviation Policy and Regulations I
- Crash Survival
- Risk Awareness

Currency

- Fixed-Wing Manager Refresher Training (CBT) (3 years)
8. FIXED-WING MANAGER - SPECIAL USE

Government representative who works jointly with the pilot-in-command and air crewmembers to ensure safe, efficient flight management of missions other than point to point flying, i.e., reconnaissance below 500 feet, infrared, aerial photo, and other missions requiring special training and/or equipment.

**Required Training**

- Aircraft Capabilities & Limitations
- Aviation Life Support Equipment
- Aviation Mishap Reporting
- Aviation Safety
- Aviation Transportation of Hazardous Materials (if involved in the transport of hazardous materials)
- Crash Survival
- Fixed-Wing Safety
- Flight Payment Document
- Mission Planning & Flight Request Process
- Personal Responsibility & Liability Preflight Checklist & Briefing/Debriefing
- Risk Awareness

**Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy**

- Airspace Management & Coordination
- Aviation Acquisition/Procurement I
- Aviation Policy and Regulations I
- Aviation Policy and Regulations II
- Aviation Radio Use
- Crew Resource Management
- Human Factors in Aviation
- Implementing Aviation Safety & Accident Prevention
- Mission Specific Training (as required by agency)
- Risk Management
- Water Ditching and Survival

**Currency**

Fixed-Wing Manager-Special Use Refresher Training (3 Years)

9. FLIGHT CREWMEMBER

A pilot, flight engineer, or flight navigator assigned to duty in an aircraft during flight time who holds a valid FAA Airman's Certificate and Airman's Medical Certificate.

**Required Training**

- Airspace Management & Coordination
- Aviation Life Support Equipment
- Aviation Mishap Reporting
- Aviation Policy & Regulations I
- Aviation Policy & Regulations II
- Aviation Safety
- Aviation Transportation of Hazardous Materials (if involved in transport of hazardous materials)
- Crash Survival
- Crew Resource Management
- Flight Payment Document
- Human Factors in Aviation
- Interagency Aviation Organizations
- Mission Planning and Flight Request Process
- Overview of Safety & Accident Prevention Programs
- Personal Responsibility & Liability Risk Management

**Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy**

- Aviation Dispatching

**Currency**

Per Agency Policy
10. HELICOPTER MANAGER

Responsible for coordinating, scheduling, managing, and supervising operations involving helicopters. (Agencies who follow the *Interagency Helicopter Operations Guide* need to adhere to IHOG training and qualifications standards in Chapter 2.)

**Required Training**

- Aircraft Capabilities & Limitations
- Aviation Acquisition/Procurement I
- Aviation Life Support Equipment
- Aviation Mishap Reporting
- Aviation Policy & Regulations I
- Aviation Safety
- Aviation Transportation of Hazardous Materials (if involved in transport of hazardous materials)
- Aircraft Capabilities & Limitations
- Crash Survival
- Aviation Acquisition/Procurement I
- Flight Payment Document
- Aviation Life Support Equipment
- Helicopter Operations
- Aviation Mishap Reporting
- Helicopter Safety
- Aviation Policy & Regulations I
- Mission Planning & Flight Request Process
- Aviation Safety
- Overview of Safety & Accident Prevention Programs
- Aviation Transportation of Hazardous Materials (if involved in transport of hazardous materials)
- Preflight Checklist & Briefing/Debriefing
- Risk Awareness

**Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy**

- Aircraft Maintenance
- Aircraft Pre-Use Inspections
- Airspace Management & Coordination
- Aviation Acquisition/Procurement II
- Aviation Dispatching
- Aviation Planning
- Aviation Policy & Regulations II
- Aviation Radio Use
- Crew Resource Management
- Helicopter Field Exercises
- Helicopter Flight Manuals
- Human Factors in Aviation
- Implementing Aviation Safety & Accident Prevention
- Interagency Aviation Organizations
- Mission Specific Training (as required by agency)
- Risk Management
- Water Ditching and Survival

**Currency**

- Helicopter Manager Refresher Workshop (as required by agency)

11. MISSION SPECIALIST

Employees who perform special missions using aircraft where specialized skills are necessary to accomplish the mission, i.e., ACETA operations, aerial ignition, rappelling, short-haul, search and rescue, and law enforcement.

**Required Training**

- Aircraft Capabilities & Limitations
- Aviation Life Support Equipment
- Aviation Mishap Reporting
- Aviation Safety
- Crash Survival
- Fixed-Wing Safety (as appropriate)
- Helicopter Safety (as appropriate)
- Preflight Checklist and Briefing/Debriefing

**Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy**

- Aviation Policy & Regulations I
- Mission Specific Training (as required by agency)
- Aviation Radio Use
- Personal Responsibility & Liability
- Crew Resource Management
- Risk Awareness
- Human Factors in Aviation

**Currency**

- Per Agency Policy for Mission Specialty
- Air Crewmember Refresher Training (CBT) (3 years)
12. PASSENGER

Any person on board an aircraft who does not perform the function of a flight crewmember or air crewmember.

**Required Training**  
Passenger Safety Briefing to include *Aviation Pocket Users Guide* (NFES 1373)

**Currency**  
Every Flight

13. PROJECT AVIATION MANAGER

An individual who plans, organizes, and manages the aviation operations of a project utilizing more than one aircraft simultaneously. The Project Aviation Manager may or may not be at the site.

**Required Training**

- Aircraft Capabilities & Limitations
- Aviation Acquisition/Procurement I
- Aviation Life Support Equipment
- Aviation Mishap Reporting
- Aviation Planning
- Aviation Policy & Regulations I
- Aviation Safety
- Aviation Transportation of Hazardous Materials (if involved in the transport of hazardous materials)
- Crash Survival
- Fixed-Wing Safety (as appropriate)
- Flight Payment Document
- Helicopter Safety (as appropriate)
- Implementing Aviation Safety & Accident Prevention
- Mission Planning and Flight Request Process
- Overview of Safety and Accident Prevention Programs
- Personal Responsibility & Liability
- Preflight Checklist and Briefing/Debriefing
- Risk Management
- Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy

- Aircraft Pre-Use Inspection
- Airspace Management & Coordination
- Aviation Dispatching
- Aviation Policy & Regulations II
- Aviation Policy & Regulations III
- Aviation Radio Use
- Crew Resource Management
- Human Factors in Aviation
- Interagency Aviation Organizations
- Mission Specific Training (as required by agency)

**Currency**  
Project Aviation Manager Refresher Workshop (as required by agency)
14. REGIONAL/STATE/NATIONAL AVIATION MANAGER

Individual responsible for aviation operations within a geographical area as defined by the agency.

**Required Training**

- Aircraft Capabilities and Limitations
- Airspace Management & Coordination
- Aviation Acquisition/Procurement I
- Aviation Acquisition/Procurement II
- Aviation Life Support Equipment
- Aviation Mishap Reporting
- Aviation Planning
- Aviation Policy & Regulations I
- Aviation Policy & Regulations II
- Aviation Policy & Regulations III
- Aviation Safety
- Crash Survival
- Human Factors in Aviation
- Implementing Aviation Safety & Accident Prevention
- Interagency Aviation Organizations
- Mission Planning and Flight
- Request Process
- Personal Responsibility & Liability
- Risk Management

**Additional Requirements WhenSpecified by Individual DOI Bureau/Forest Service Policy**

- Aviation Dispatching
- Aviation Transportation of Hazardous Materials (if involved in the transport of hazardous materials)
- Crew Resource Management
- Flight Payment Document
- Mission Specific Training (as required by agency)
- Preflight Checklist & Briefing/Debriefing

**Currency**

- Agency Specific Currency Workshop/Conference

15. SUPERVISOR

Those who supervise employees who use aircraft to accomplish agency programs (first- and second-line supervisors as determined by the agency).

**Requirements Specified by DOI or Forest Service Policy**

- Aviation Policy & Regulations I
- Aviation Policy & Regulations II
- Human Factors in Aviation
- Overview of Aircraft Capability & Limitations
- Overview of Safety & Accident Prevention Programs
- Personal Responsibility & Liability

**Currency**

- Supervisor Refresher Training (agency specific)
16. UNIT AVIATION MANAGER

Individual with aviation management responsibilities for a local unit or forest level and serves as the focal point for aviation services and management, such as USFS Forest Aviation Officer (FAO), NPS Park Aviation Manager, BIA Agency Aviation Officer.

**Required Training**

- Aircraft Capabilities and Limitations
- Airspace Management and Coordination
- Aviation Acquisition/Procurement I
- Aviation Life Support Equipment
- Aviation Mishap Reporting
- Aviation Planning
- Aviation Policy and Regulations I
- Aviation Policy and Regulations II
- Aviation Radio Use
- Aviation Safety
- Aviation Transportation of Hazardous Materials
  (if involved in the transport of hazardous materials)
- Crash Survival
- Fixed-Wing Safety
- Flight Payment Document
- Helicopter Safety
- Human Factors in Aviation
- Implementing Aviation Safety and Accident Prevention
- Interagency Aviation Organizations
- Mission Planning and Flight Request Process
- Overview of Safety and Accident Prevention Programs
- Personal Responsibility and Liability
- Risk Management

**Additional Requirements When Specified by Individual DOI Bureau/Forest Service Policy**

- Aviation Policy and Regulations III
- Crew Resource Management
- Mission Specific Training (as required by agency)
- Preflight Checklist and Briefing/Debriefing

**Currency**

- Unit Aviation Manager Refresher Workshop (as required by agency)

**Notes:**

Cells with an "X" indicate that the NWCG course gets credit for equivalency training for the Aviation Training 2000 module in the corresponding row.

**NWCG course names** are: S-217=Interagency Helicopter Training Guide; S-270=Intermediate Air Operations; S-370=Advanced Air Operations; S-371=Helibase Manager; J-375=Air Support Group Supervisor; S-378=Air Tactical Group Supervisor; S-470=Air Operations Branch Director.
PART 3
MODULE CATALOG

A-101 AVIATION SAFETY (all aircraft)
Media: CBT  Approximate time: 30 minutes
Covers employee safety while working around helicopter and airplane operations. Topics include passenger responsibilities, ground safety, air safety, "five steps to a safe flight," and flight following.

A-102 FIXED-WING SAFETY
Media: CBT  Approximate time: 30 minutes
Covers operational safety aspects specific to fixed-wing aircraft. Topics include loading and unloading, hazards, briefing, fire extinguisher locations, and securing cargo.

A-103 HELICOPTER SAFETY
Media: CBT  Approximate time: 30 minutes
Covers operational safety aspects specific to helicopters. Topics include loading and unloading, hazards, briefing, fire extinguisher locations, and securing cargo.

A-104 OVERVIEW OF AIRCRAFT CAPABILITIES AND LIMITATIONS (helicopters/fixed-wing)
Media: video  Approximate time: 15 minutes
A condensed version of the aircraft capabilities and limitations module that gives supervisors a basic understanding of commonly used aircraft and their mission capabilities.

A-105 AVIATION LIFE SUPPORT EQUIPMENT
Media: video/workbook  Approximate time: 30 minutes
Provides information on equipment and procedures for protecting aircrews, passengers, and support personnel engaged in aviation activities especially during mishap and survival situations. While the emphasis is on special use activities, other mission-specific equipment such as fire extinguishers, first aid kits, restraint systems, personal protective equipment (PPE), and over-water equipment are also covered.

A-106 AVIATION MISHAP REPORTING
Media: CBT  Approximate time: 15 minutes
Covers basic agency policy on procedures for reporting aircraft accidents, incidents with potential and incidents; how to use the SAFECOM reporting system; procedures for responding to aircraft mishaps; and procedures for overdue or missing aircraft.
A-107 AVIATION POLICY AND REGULATIONS I  
*Media: CBT*  
*Approximate time: 30 minutes*

A basic overview of agency aviation policy and standards and where to find them. Covers agency and interagency manuals, handbooks and guides as well as a brief summary of the Federal Aviation Regulations (FARs).

A-108 PREFLIGHT CHECKLIST AND BRIEFING /DEBRIEFING  
*Media: CBT*  
*Approximate time: 15 minutes*

Covers the step-by-step process to assure a safe and efficient flight. Topics include preflight inspections, airplane compliance with FARs, contracts and agency policy. In addition, covers what to look for when checking agency pilot and aircraft cards and items to be covered in a pilot briefing as well as a debriefing.

A-109 AVIATION RADIO USE  
*Media: video/workbook/CBT*  
*Approximate time: 30 minutes*

Provides a basic understanding on the operation of aircraft radios including: VHF-AM, multichannel, programmable, handheld, pigtail adapter, and agency radios. Covers communication requirements, radio tones and their use, and communication systems within aircraft. Also includes the use of Air Guard, frequency management, and radio discipline.

A-110 AVIATION TRANSPORTATION OF HAZARDOUS MATERIALS  
*Media: CBT*  
*Approximate time: 1 hour*

This training complies with U.S. Department of Transportation Regulations 49 CFR 171.8 whereby agency employees who transport hazardous materials by air must receive training on the requirements and conditions of the exemption to 49 CFR 175.5 (a) (2). Topics include handling procedures, policy requirements, mishap notification, packaging, identifying hazardous materials, and safety requirements.

A-111 FLIGHT PAYMENT DOCUMENT  
*Media: CBT*  
*Approximate time: 1 hour*

The module covers procedures for completing and processing aircraft use reports. Includes: USDI OAS-23 Aircraft Use Report and USDA-FS 6500-122 Flight Use Record, as well as daily logs.

A-112 MISSION PLANNING AND FLIGHT REQUEST PROCESS  
*Media: CBT*  
*Approximate time: 1 hour*

Covers the basic duties and responsibilities required when ordering and coordinating flights. Topics include how to plan for a flight, information required to order a flight, flight manager responsibilities, flight following requirements, pilot flight and duty limitations, and pilot and aircraft approval.
A-113 CRASH SURVIVAL
*Media:* video/handout  
*Approximate time:* 30 minutes

This module is an overview of critical actions required to increase survivability in the event of an aircraft accident. Emphasis is on pre-accident preparedness, postcrash survival, physiological and psychological factors, survival equipment, desert or summer survival, and mountain or winter survival.

A-201 OVERVIEW OF SAFETY AND ACCIDENT PREVENTION PROGRAMS
*Media:* CBT  
*Approximate time:* 1 hour

Designed to provide condensed training on aviation safety and accident prevention programs. Topics include summaries of safety policy, agency aviation accident prevention plans, and accident, incident with potential and incident reporting systems and trend analysis.

A-202 INTERAGENCY AVIATION ORGANIZATIONS
*Media:* CBT  
*Approximate time:* 1 hour

An overview of the different aviation management organizations within the Federal, state, and local land management agencies. Students get a good working knowledge of where to get aviation technical assistance, what the different aviation functional groups can provide, and what their duties consist of. Also covered is the interagency uniqueness within the aviation community and how these organizations work together.

A-203 AIRSPACE MANAGEMENT AND COORDINATION
*Media:* CBT  
*Approximate time:* 1 hour

Technical training in airspace management with emphasis on flight and operating rules of the national airspace system. Covers coordinated use of the National Airspace System including topics such as notices to airmen (NOTAMs), temporary flight restrictions, Federal Aviation Regulations, deconfliction of airspace, restricted areas, military training routes, airspace intrusion, and the use of temporary towers.

A-204 AIRCRAFT CAPABILITIES AND LIMITATIONS (helicopters/fixed-wing)
*Media:* video/workbook  
*Approximate time:* 30 minutes

Covers the identification and basic capabilities of helicopters and airplanes. Module is structured to include aircraft commonly encountered or utilized by the trainee audience. Module identifies to what extent aircraft performance decreases through limitations and how exceeding limitations may result in failure. Covers the four basic forces that effect flight and the basic principles of flight. Stresses the fundamentals of aircraft performance planning to include weight, balance, and density altitude.
A-205 RISK AWARENESS

Media: video  
Approximate time: 30 minutes

The module presents techniques that may be utilized to identify, analyze, and manage many of the risks of aviation operations. Information presented is geared toward users.

A-206 AVIATION ACQUISITION/PROCUREMENT I

Media: CBT  
Approximate time: 30 minutes

A-207 AVIATION DISPATCHING

Media: classroom  
Approximate time: 4 hours

Covers basic principles to prepare the trainee to process aircraft orders and forms, determine proper aircraft, schedule flights, keep track of aircraft costs, order aircraft services, conduct briefings with "flight managers," utilize resource tracking systems, initiate search and rescue, flight planning and flight following, and ensure proper aircraft utilization.

A-208 AIRCRAFT PRE-USE INSPECTION

Media: video/workbook  
Approximate time: 1 hour

Covers the step-by-step process to ensure that all the items necessary for safe and efficient aircraft operations are accomplished. Includes preflight inspections, maintenance and air worthiness issues, contracts, and agency policy regarding aircraft equipment and condition requirements as well as operating handbooks and minimum equipment lists (MEL). Covers what to look for when checking agency aircraft cards.

A-209 HELICOPTER OPERATIONS

Media: classroom  
Approximate time: 3 hours

Technical training on how to work with helicopters in a natural resource environment. Includes information on operational planning, load calculations, take off and landing areas, personnel and cargo transportation, fueling, and specialized missions.

A-210 HELICOPTER FIELD EXERCISE

Media: field exercise  
Approximate time: 8 hours

A field exercise with hands-on helicopter training including load calculations, manifesting, passenger transportation, cargo transportation, sling loads, hover hook up, hand signals, and radio communication.
A-211  AVIATION PLANNING  
Media: classroom  
Approximate time: 1 hour

Covers aviation planning requirements and procedures to prepare and carry out an aviation plan at all levels of an organization. Includes Regional/Unit, Forest, and Project Aviation Planning. Also covers how to analyze, coordinate, and administer aviation activities with aviation plan. Includes organizations, aircraft use, operations, business management, personnel requirements, equipment needs, communications, flight plans, and safety procedures.

A-301  IMPLEMENTING AVIATION SAFETY AND ACCIDENT PREVENTION  
Media: classroom  
Approximate time: 1 hour

Covers system safety management principles and safety techniques. This module will provide the student with sufficient knowledge to apply aviation safety principles to agency missions. Topics include safety program marketing, accident prevention techniques, monitoring accident trends, implementing prevention action, and preparing and implementing an Aviation Accident Prevention Plan program.

A-302  PERSONAL RESPONSIBILITY AND LIABILITY  
Media: CBT  
Approximate time: 1 hour

The module is designed to develop an understanding of personal and organizational responsibility and liability in aviation program operations. Topics include scope of employment as applies to liability, investigation for litigation, FAA/NTSB regulations, damages, legal considerations, product liability and government regulations, judicial options, and insurance and punitive damages and remedies.

A-303  HUMAN FACTORS IN AVIATION  
Media: video  
Approximate time: 1 hour

Covers principles of behavioral science relevant to aviation safety. The module describes the interaction between people, mission, machine, and medium (environment); and it will provide students with a working knowledge of hazard control techniques. Topics include physiology/biomedicine, psychology, human engineering, and communication.

A-304  AIRCRAFT MAINTENANCE  
Media: CBT  
Approximate time: 2 hours

An overview of what aviation managers should look for to assure that proper aircraft maintenance is being performed. Topics include maintenance specialists' duties, the pilot's role in maintenance, pilots functioning as mechanics, mechanic approval, scheduled maintenance, daily preflight check, turbine engine power checks, test flights, airworthiness directive and service bulletin compliance, and approved aircraft inspection programs.
A-305  RISK MANAGEMENT

*Media:* classroom  
*Approximate time:* 1 hour

The module provides technical training in applying risk management with focus on field users. Topics covered include risk management principles, hazard identification, making risk decisions, implementing controls, and responsibility. Studies risk factors and how to avoid them.

A-306  AVIATION ACQUISITION/PROCUREMENT II

*Media:* classroom  
*Approximate time:* 2 hours

An in-depth study of aviation contracting procedures including: preplanning and initiation of procurement, development of negotiation evaluation criteria, solicitation, negotiation, and award. Developing partnerships between government and contractor. Dealing with claims and dispute resolution. Discuss case studies representing historical problem areas.

A-307  AVIATION POLICY AND REGULATIONS II

*Media:* classroom  
*Approximate time:* 2 hours

Designed to provide training on the aviation directive system within each agency while giving the trainee a working knowledge of policy and procedures for the management and use of government aircraft. Topics include agency aviation management manual structures and applicable Office of Management and Budget circulars and bulletins and Federal Aviation Regulations (FARs). Additionally, covers aircraft use justification and cost accounting for general and special travel approvals and reporting requirements specifically directed towards senior officials traveling on government aircraft. Also, provides information on "space available" travel. Provides participants with an understanding of the term "public aircraft" and its effect on agency aviation policy.

A-308  AVIATION POLICY AND REGULATIONS III

*Media:* classroom  
*Approximate time:* 4 hours

A comprehensive study of how agencies develop and implement aviation policy. Topics include: manuals, handbooks, and guides as well as preparing "Grants of Exemption," OMB A-76 Performance of Commercial Activities, A-126 Improving the Management and Use of Government Aircraft Circulars, A-123 Internal Control Systems, and GSA Federal Property Management Regulation (FPMR) 101-137 Government Aviation Administration and Coordination. Also covers the Code of Federal Regulations that apply to aviation management and how government agencies apply to Federal Aviation Regulations (FARs). In addition, the module contains a briefing to provide managers with a broad understanding of the Interagency Committee on Aviation Policy (ICAP) and how this group interacts with agency aviation management.
**A-309 HELICOPTER FLIGHT MANUALS**  
*Media: classroom/video/workbook*  
*Approximate time: 2 hours*

Technical training on helicopter performance planning. Topics include performance capabilities, weight & balance calculations, limitations, and system descriptions.

**A-310 CREW RESOURCE MANAGEMENT**  
*Media: CBT*  
*Approximate time: 2 hours*

This training provides information on the roles and responsibilities of flight and air crewmembers in aviation operations. Emphasis is placed on communication needs to ensure a safe flight during routine operations and during an emergency. It covers leadership and communication skills, which will create an environment that encourages crewmember involvement leading to safe aviation operations.

**A-311 AVIATION PROGRAM OVERVIEW FOR AGENCY ADMINISTRATORS**  
*Media: classroom*  
*Approximate time: 1 hour*

A synopsis of aviation policy, safety and accident prevention, training and qualification requirements of employees, liability, procurement, and aviation organizations as they relate to line officer responsibilities.

**A-312 WATER DITCHING AND SURVIVAL**  
*Media: classroom*  
*Approximate time: 5 hours*

The Water Ditching and Survival module teaches the student the proper procedures to follow in the event of aircraft ditching. The module gives the student the skills needed to safely egress and reach the surface of the water. The module includes the use and familiarization of personal flotation devices (PFDs). Life raft and water survival techniques are stressed. The module is divided into two segments: academic and hands-on in-water exercises. The student will experience a water dunker that puts them in a simulation of a ditched aircraft.

**REFRESHER TRAINING**

The following training is available through a computer-based format. Employees with aviation duties are able to stay current by taking this refresher training off the Internet. This process allows managers to keep employees current with little impact to budgets and time. Currency training is kept up-to-date with policy changes and information. On an average, training takes around two hours to complete. Employees are given random questions after going through a series of exercises. This training is a pass, and takers will need a 90 percent or better to pass. Records will be kept on a central database.

- **A-401** Aviation Dispatcher Refresher Training  
- **A-402** Air Crewmember Refresher Training  
- **A-403** Fixed-Wing Manager (Special Use) Refresher Training  
- **A-404** Fixed-Wing Manager Refresher Training  
- **A-405** Aviation Transportation Of Hazardous Material
REFRESHER TRAINING WORKSHOPS

The following workshops are available and conducted as a minimum every three years. These workshops are targeted for mid- to upper-level managers in aviation. They are designed to keep employees current and to allow for an exchange of information.

A-406 Helicopter Manager Refresher Workshop
A-407 Project Aviation Manager Refresher Workshop
A-408 Supervisor Refresher Training (Agency Specific)
A-409 Unit Aviation Manager Refresher Workshop
A-410 Aviation Management Technical Specialist Refresher Workshop (Agency and Job-Title Specific)
PART 4

INTERAGENCY AVIATION INSTRUCTOR REQUIREMENTS

OBJECTIVE

This appendix identifies minimum aviation management training requirements for instructors of materials within the Aviation Training 2000 Program. Because of the complexity and/or technicality of aviation skills needed to perform aviation missions, instructors need to possess certain skill levels to assure information is being presented as effective as possible.

Three levels of instruction have been developed to ensure that national interagency standards are met.

CERTIFICATION

 Agencies have the responsibility for certification of aviation trainers and should maintain a list of certified instructors as appropriate.

LEVEL I INSTRUCTION

This level is for basic aviation skills training. This includes all the A-100 modules. Unit aviation managers will be responsible for certification to instruct at this level. To be approved to instruct at this level an individual must:

1. Demonstrate competencies in adult learning understanding, audiovisual skills, instructor skills, and presentation/platform skills.

2. Demonstrate a working knowledge of the subject matter/concept for which they are going to instruct.

3. Demonstrate an ability to deal effectively with the everyday situations that develop in a given area of responsibility.

LEVEL II INSTRUCTION

This level is for intermediate aviation skills training. This includes all the A-200 level modules. Regional/state aviation managers will be responsible for certification to instruct at this level. To be approved to instruct at this level an individual must:

1. Demonstrate all the competencies in Level I.
2. Complete (satisfactorily) a certified instructor training class, i.e., Instructor 1A or 1B (usually offered at junior colleges), or the NWCG Train-the-Trainer program as a lead instructor, or a certified instructor approved through the OAS Interagency Aviation Trainer (IAT) program, or comparable teaching experience.
3. Complete a Train-the-Trainer refresher for any module that they have not instructed in 5 years.

LEVEL III INSTRUCTION

This level of instruction requires the highest level of expertise. This includes all the A-300 level modules. National level aviation training specialists will be responsible for certification to instruct at this level. To be approved to instruct at this level an individual must:

1. Demonstrate all the competencies of Levels II and II.
2. Be current with the subject matter and have aviation management as one of their primary duties.
3. Is a subject matter expert at the working level or be an expert level instructor based on criteria assigned by each agency.
4. Complete a formal Train-the-Trainer course for each specific module (an individual Train-the-Trainer course may cover more than one Level III module).
5. Complete a Train-the-Trainer refresher for any module that they have not instructed in 5 years.
